Subject: Request for Assistance with System Issues in 90s System Lab (AIML)

Respected Principal,

I, **K. Vijay Babu**, am writing to bring to your attention some important issues in the 90s System Lab (AIML) that are affecting productivity and lab sessions. I request your support to resolve these problems at the earliest.

Issues Identified

1. **Operating System (OS) Problems:**

   o Some systems frequently crash, disrupting lab sessions.

   o OS updates are pending, causing compatibility issues with new software.

2. **Software Problems:**

   o Essential software like **Anaconda Navigator (Latest Version)**, **Oracle 10g**, and **Ubuntu (Linux)** is not working properly on certain systems.

3. **Non-Functional Systems:**

   o The following systems are completely non-functional: **5, 6, 41, 42, 47, 36, 38, 39, 57, 54, 69, 63**.

   o Internet is also not working properly.

   o Systems **37, 59, 60, and 62** are functional but very slow, affecting efficiency.

Proposed Solutions

1. Approve a system-wide OS update to resolve compatibility and performance issues.

2. Renew software licenses and ensure all systems have the necessary installations.

3. Arrange for repair or replacement of non-functional systems and improve internet connectivity.

Thank you for your attention and support. I look forward to your guidance in resolving these issues.

Yours sincerely,
K. Vijay Babu
